

Making College Affordable

Testimonials

A few words from our past and current clients.

To Whom It May Concern:

When we started with the college and financial aid application process it all seemed so overwhelming! We weren't sure how we were going to help our son get into college and we certainly weren't aware of the many forms and applications we had to fill out in order to receive financial aid. Therefore, we would like to thank Jason and the staff at National College Planners for showing us how to navigate and streamline it all.

From assisting our son with selecting his schools to helping us with the FAFSA application our entire experience with National College Planners has been invaluable. Our original thought was to have our son apply to the local University of California and live at home but with Jasons' help we were able to understand that there were many other options, including some of the private universities which we had thought were completely out of our reach. The college application process is long but the staff at National College Planners helped our son complete his applications thoroughly with well written essays.

Additionally, their help with the FAFSA forms qualified us for more financial aid than we expected. Our son received \$24,708 in grants and scholarships for his first year; which will amount to approximately \$98,832 in free money by the time he graduates! We are very pleased with this assistance and thrilled to have our son attending the University of San Diego—a perfect match for him and a perfect match for our budget. Thank you Jason and National College Planners staff!
