Dear Jason and National College Planners Staff,

I realize that over the past three years, our family has not thanked you enough for all the hard work you have done on our family's behalf. Whenever I gather together the paperwork for the FAFSA and taxes and send them to NCP, I am acutely aware that this is only the tip of the iceberg of paperwork necessary for making it possible for our daughter to go to college. When we attended the college information nights at her high school and got a glimpse into how tricky filling in the forms was going to be, we knew we needed to ask for help. Sometimes asking for help is hard, and we do not do it when we should. Then, we have regrets. Well, we thank you for breaking this daunting paper iceberg into manageable parts and for doing the greater share of the work.

Our daughter is a hard working, determined student, and knew what she wanted to study in college. She is absolutely worth investing in. At a PTA meeting, you laid out how NCP could guide us through the FAFSA maze and get her into a school that promised an excellent education in her field. Syracuse was that school, but was way out of our league. With the FAFSA expertise of NCP, we will receive \$32,000 in Financial Aid over the course of her four years of schooling. She also has been awarded another \$8000 in grants because of extensive knowledge on your part.

I do not understand why the college admissions process has turned into such a nightmare. My friends and I did all of our own college paperwork. And financial aid (if even needed!) was a simple thing to apply for. Without the help of National College Planners, Sarah would have gone to college, but not the one of her dreams. I know we would have had regrets. I am glad we made the leap of faith to work with you and the NCP Team. The peace of mind knowing she will not be up to her neck in horrible debt is priceless. Thank you again and again for steering us around the iceberg!!

Sincerely,
Louise Rozansky
