

**Making College Affordable**

Dear Jason and the Team at National College Planners,

John and I want to thank you for helping us with the emotional roller coaster that is college applications over this past 18 months. Because J.T. is our only child, we really do want what is best for him, but due to our recent financial difficulties, we did not know if we could afford to send him to a four-year university for all four years. But after counsel with our son, you realized that he had the grades, persistence, and passion to do what he has always dreamt of doing—becoming a member of Doctors Without Borders. Though my husband and I thought J.T. should go to community college for two years and then transfer to a university to finish his degree—you encouraged us to see differently. We had never considered that we might qualify for as much financial aid that you enabled us to receive—over \$24,000 a year from Vanderbilt. We will receive almost \$100,000 in financial aid that we would have never been qualified for if you didn't help us. Not only that, now we don't have to worry about J.T. not being prepared for the MCAT or not looking as competitive on his medical school applications because he obtained his prerequisites from a junior college—two things that had not even crossed any of our minds as possible pitfalls in the future. No, our son is going to a top ranked university—all at an out-of-pocket expense that is marginally above that of the cost of the local community college. We cannot thank you enough. Our dreams and our son's dreams have come true.

Regards,

Shirley and John M.
