To Whom It May Concern:

When I went to a National College Planners Workshop in 2009, I was concerned about how we would pay for college and, even more, how we would fill out the financial aid forms properly and effectively. Jason Youngblood was a wonderful speaker and explained the process clearly.

Jason made the process easy and stress-free. We provided him with the information he requested and he took care of the rest. Our daughter received wonderful financial aid packages at every school to which she was accepted and by the time she graduates from the school of her choice, **she will have received almost \$80,000 in grant money that will not need to be repaid.** He even helped us figure out the best way for us to pay for our share of her college expenses!

Each year, when FAFSA forms are due again, I don't worry; I know they will be filled out properly and on time, assuring our daughter will continue to receive the aid she deserves. Not worrying about financial matters has left us free to actually enjoy our daughter's college years.

Sincerely,

Jessica S.
